Artist in Residence Munich – the residency program of the City of Munich and Lothringer 13 Halle, in cooperation with the Goethe-Institut are offering three research and working residencies for professional artists from various artistic disciplines (visual arts, music, literature, film, dance/performance).

During their residency, the selected artists will stay at the Ebenböckhaus and develop an independent/self-chosen project that conceptually engages with the topic of "ANTIFASCIST CULTURES OF THE PRESENT". The team of Ebenböckhaus and Lothringer 13 Halle will accompany the research process and provide support throughout the residency. Additionally, each artist will hold a studio space at Lothringer 13 Halle. It is expected that the artists will participate in a public event at Ebenböckhaus and present their project at Lothringer 13 Halle.

The residency is part of the joint project of Lothringer 13 Halle and the Goethe-Institut titled "Antifascist Cultures of the Present".

Topic

Lothringer 13 Halle, in cooperation with the Goethe-Institut, is planning an interdisciplinary project that focuses on the topic of antifascism. The project aims to highlight antifascism as a central responsibility of democratic societies. Throughout the project the guiding thesis is:

Democratic (cultural) work is antifascist work.

The project particularly centers on a new generation of artists, curators, theorists, and cultural workers whose practices are dedicated to antifascism. Antifascism is, in this context, not understood solely as resistance to historical or open far-right movements, but as an active, multifaceted engagement against authoritarian, racist, antisemitic, and nationalist structures of the present. The goal is to normalize antifascism as a shared social responsibility, rather than limiting it to or associating it exclusively with the political left.

A special emphasis is placed on contributions from Eastern and Southeastern Europe, as the political and social dynamics of these regions serve as a barometer for the fragility of democratic structures. The increasing influence of Russia and the instability of many governments in the region underscore the necessity to understand and strengthen antifascist (cultural) work beyond national borders.

The project includes a multisensory symposium, an exhibition, performances, and a series of different formats taking place at sites in and around Munich, as well as in the (South-)Eastern European region, that are historically associated with Nazism and contemporary nationalisms. After the presentations in Munich (January – July 2026) the program aims to tour in various countries of (South-)Eastern Europe in 2026/2027, together with the Goethe-Institut and local institutions. The conceptual and curatorial direction of the project is led by Kalas Liebfried, a Bulgarian artist and curator, and the artistic director of Lothringer 13 Halle.
